Pre & Post Service:

Color Attach Step 1 – Pre Color Service

Color Attach Step 2 – Post Color Service

Decolorizer Formula

30g Healing Cream Decolorizer + 30g 20 Volume
Healing Color Developer + 5g Trauma Treatment

Beauty Bath (Mild Formula)

30g Healing Color-Cleansing Shampoo + 30g Healing
Powder Decolorizer + 30g Water (Warm) + 5g Trauma
Treatment

VIBES Glaze Formula

16g VIBES Smoke + 90g VIBES Clear

VIBES Accent Colors

20g VIBES Smoke
(separate mixture)

5g VIBES Blue

*Model Began with a Starting Level 4

SMOKED

1. Begin by applying the **Decolorizer Formula** to new growth area. Then brighten previously lightened ends with a mild **Beauty Bath**. Process until all hair reaches a Level 9, then rinse.
2. Perform an **Ultimate Treatment** using 1-pump Strength Booster and 1-pump Moisture Booster, then blow-dry.
3. Spray **Color Attach Step 1** throughout hair and comb through. Complete an all-over application with **VIBES Glaze Formula**. Process for 30 minutes, then rinse. Cleanse with **Healing Color Care Shampoo**, and blow-dry.
4. Spray **Color Attach Step 1** throughout hair and comb through. Part head in half. Where hair is heaviest, part that side into a flat moon-shape, the length of the parietal ridge. In back-to-back foils, apply **VIBES Accent Colors** using the VIBES Sponge Brush to create softness with saturation. Start application with **VIBES Smoke**, then outline each section using **VIBES Blue**. Exercise your creativity and design your own unique placement pattern!
5. In the nape area, divide the back in half. From the center part, take a heavy triangle to the back of the right and left ear, and continue application. There will be a total of 4 foils on each side of the nape, and 3-4 on top of the head.
6. Process for 30 minutes, then rinse, cleanse, and condition with **Healing ColorCare Shampoo & Conditioner**. Spray **Color Attach Step 2** into towel-dried hair and comb through.

TIP: Use L'ANZA Color Films while applying VIBES Accent Colors to monitor processing and color placement.

STYLE FOUNDATION

1. Cleanse and condition with **Healing ColorCare Shampoo and Conditioner**.
2. On damp hair, apply 1-2 pumps of **Zero Weight Gel** from scalp to ends.
3. Blow dry using a cushion brush, following the ABCs of blow-drying. Start working the base until it is dry, next the mid-lengths, and finally the ends.

STYLE 1

1. Using clips, isolate a small ½" inch section along the front hairline out of the way, and direct the remaining hair back, away from the face.
2. Lay hair-quilting net over the top of the head, and secure neatly around hairline. Beginning at the front, use a hair hook to pull small loops through the net.

Note: Be careful not to pull the isolated hairline sections!

3. Continue creating the quilted texture, working your way from front to back. When you reach the parietal ridge in the back, secure perimeter of the netting with bobby pins. Trim excess netting away with scissors.
4. Release isolated areas at front hairline, and apply a small amount of **Keratin Healing Oil Hair Treatment** to lengths of the hair, then flat iron smooth. Finish with a generous mist of **Color Illuminator**, to enhance hair color and finish.

STYLE FOUNDATION

1. Cleanse and condition with **Healing ColorCare Shampoo and Conditioner**.
2. On damp hair, apply 1-2 pumps of **Zero Weight Gel** from scalp to ends.
3. Blow dry using a cushion brush, following the ABCs of blow-drying. Start working the base until it is dry, next the mid-lengths, and finally the ends.

STYLE 2

1. Create a section from behind the ear on one side, and over the top of the head to behind the ear, on the opposite side. Secure the hair in back of the head neatly, out of the way.

2. Use a little **Texture Cream** on your fingertips, and create small 1" square ponytail sections along the front hairline, creating a clean finish. Make sure to use a straight line to connect all squares, placing the elastic toward the back of each square, so the elastic isn't sitting right on the hairline.

3. Create another row of squares immediately behind the first. This time, make sure each square sits in a brick-lay pattern behind the first row (the corners of the first-row squares will be in the center of the back-row squares). Secure elastics toward the back of the squares again. Continue this brick-lay pattern until all the hair in front of the ear is finished.

4. Create a small ponytail section at the back of the crown. Use **Powder-Up Texturizer** on the ends, then back-comb and roll hair into a cushion-like shape. Continue taking diagonal sections around the cushion and repeat the process: **Powder-Up Texturizer**, back-comb, and gently lay over the top of the cushion. Secure sections with hair pins as you work.

5. Create airy separation by pulling apart the shape in the back with your fingers, and allow some pieces to fall free from the shape. Use **Keratin Healing Oil Lustrous Finishing Spray** to support your work as you creatively detail the finish.
